About This Game

VR Dream Match Baseball is experience to challenge Big League pitchers.

Challenge a pro's fastballs and breaking balls as a batter and catcher! With true hitting/catching sensation. You can experience a real pitcher's balls in a big league baseball stadium with realistic sensation as a catcher or batter. You can shuffle pitch types from the menu or button operation. You can also enlarge the size of the bat or ball so that you can hit the ball more easily – a feature you could enjoy only in the digital world.

☑ Takes place in a stadium setting creating a true sensation.

☑ Catch a 102 miles/h straight ball ! Do you have the courage to catch it?

☑ Aim for home run ! You can experience pro pitchers' various pitch types, such as straight ball, curveball, splitter, etc.

☑ Data display: Catching results, batting results, results per ball and reaching distance

☑ When you hit a home run, grand fireworks and great cheers will bless you.

Super Skelly Quest 2018 is my favorite game of the last century.. So at the time I am writing this review I have 8.3h and this is my experience and opinion about this game.

So I started off quite recently and I went in to this game with basically no experience. So when you start, you will be placed in a coastal city. That's where all the fresh spawns start. In the southern and eastern beginning areas players are more friendly and more looking into teaming up. If you come across a player they probably won't shoot on sight. Now you will need to get basic gear before you travel more to the middle of the map which will contain better loot. I recommend getting a friend who has a lot of experience with a game to make it easier for your self to understand, but it's okay if you want to solo. I recommend an app called iZurvive. It's an app that has a map online days with all locations marked. You can call it cheating in a way as it gives you advantage of map knowledge without needing to find a map in game. Also i recommend to also learn how to read Russian because it's important if you want to learn to read signs to which city your leaving or entering. I didn't encounter any glitches maybe some di-sync but that is pretty much that for it. Game is fun solo or group. If your buying, watch some tutorials for basic things for a game. I like this game and it can get addictive. I recommend it. Fun, exciting and fast game, yet very relaxing. Worth a try for sure!. A game about Super sperm fantastic. <https://www.youtube.com/watch?v=m50sG8sayeI>

[Video containing my full thoughts:](#)

[TLDW: This game is alright. I think it's more consistently funnier than previous games. but I feel like the concept wasn't as well explored as it should've been.](#)

[I would've liked a plot-line involving battling a hacker, and multiple different routes you could take through a map leading you to different hilarious endings.](#)

[It's ok for what it is and I feel Alain is still trying here. I think if he made an effort to make his games just a bit longer, that would open up a lot more comedy potential. Cheers.](#)

Great game just the same as 15 years ago.. :) Picked it up for 0.50, totally worth. Still some little bugs but the game is cute overall :D. good art element to a basic indie game. On some missions, they use bad grammar and i'm not sure what to do, but overall, great game!. I thought this game was pretty average with a good amount of customisation at first. Diplomacy system is very lacking (you can send the AI a request that only hurts you and they'll refuse). It's still very fun, but not something I'd actively recommend.

Then I shot at the galactic central point and made every star near it go supernova, winning a round by nuking the entire galaxy.

I'd definitely recommend people try it, there's a lot of fun to be had in just what you can make and how much damage you can do.. Why was this game so underrated? i mean there are a couple minor glitches..... but you still have hentai.... right?. Highly recommend!

Feel bad writing this review at only .6hr logged ...however, that demonstrates how much I'm already enjoying it!

Pros:

- Great graphics - like the cartoony style & is (even in EA) a very populated & varied environment

- Gameplay - everything's easy & intuitive (weapons, moving, options, etc)

- From exploring to puzzles to sailing a pirates ship

- Sounds also solid & fits the theme

Cons:

- Might need to play further to come up with some...

- Locomotion follows a *path* ("nodes" as dev calls it, I believe) - personally, I LOVE free-roam in games, but I'm perfectly fine with the locomotion chosen & it doesn't bother me one bit. I understand why they went this route, but from some discussions it looks like they might make changes\give options. Again, I personally like it for this game but understand why some people might prefer more std locomotion\teleporting.

I also appreciate the devs engagement in forums & like the roadmap.

I've gonna hit the forums & keep engaged with roadmap plans.

TL;DR It's quite polished for VR EA game. Think "Vanishing Realms" but less solely focused on combat (tho' plenty) & more about Adventure(puzzles\exploring\traversing the world).. Great game, stick to the bible! Now I can read the chapters in the bible while im playing a game! How COOOOL!. too short of a story but visually stunning
